

KOI-POND OR CAT FEEDER TYPICAL OUTDOOR INSTALLATION

Lid supplied with feeder

Slot hole for lid locking screws supplied with feeder.

Do not use metal washers underneath screws when using lid on large hopper.

4-40 screw and strap supplied with hopper. Strap not used on short cat feeder stand.

#8 large head screws supplied with hopper (2 ea.)

1.5 gallon hopper

Hole could be used with optional large washer, screw and spacer on other side -- could also be used for pipe mounting.

Capacity

- 1.8 gallon with 2 clear extensions
- 1.6 gallon with 1 clear extension
- 1.55 gallon without extensions
- 3.3 gallons with 2 hoppers stacked together

(Use supplied extension screws and washers)
4-40 screw and metal washer. Only tighten enough to lock onto feeder or extension. Do not over-tighten. (Additional strap can also be used)

• Refer to Super Feeder manual and/or video for further details when mounting to short cat feeder stand.

(1 strap, 6 4-40 screws and 5 washers supplied with feeder) Do not use washer under screw with metal strap on this side.

None, one or two clear extensions may be used with hopper (2 ea. supplied with feeder)

Metal bracket supplied with feeder.

4 ea. #8 large head screws supplied with feeder (2 for each side)

Optional chute cover for CSF-3 (installed on KSF-2 Koi pond feeder)

2x4 or 4x4 (perfect for bracket and straps)
2x4 or pipe could be installed near the inside edge of plastic 5 gal. bucket filled with concrete for mobile set-up -- it could be mounted up-stream of waterfall for scattered food distribution.

The whole unit could be hung using vertical pipe or vertical and lateral swivel pipe mount -- see www.super-feeder.com for details and instructions on making your own set-up or purchasing one.

KSF-2XL

CSF-3XL
